

PART 1:

GENERAL INFORMATION

International Gamco (“Gamco”) has thoroughly reviewed and internally discussed Part 1 sections 1.1 through 1.33. We fully understand and will comply with all stipulations, requirements and guidelines contained therein.

Gamco also acknowledges the procurement schedule and the Lottery’s desire to move quickly on this revenue generating project with the utmost urgency.

Having been a supplier to the Idaho Lottery for over a decade, Gamco understands the code of conduct and high levels of integrity and confidentiality the Lottery operates under.

PART 2:

IDAHO LOTTERY BACKGROUND

As a long-time supplier of the Idaho Lottery, Gamco has a strong understanding of the Lottery's history, guidelines, enabling language and markets, particularly those associated with pull-tabs.

We fully understand and will comply with this section.

Gamco has invested its resources in researching and studying the Idaho pull-tab market and its potential.

We look forward to providing the Lottery with an on-going revenue source of significance through this pull-tab program.

PART 3:

GENERAL CONTRACT TERMS FOR RESULTING CONTRACT

The Directors and Officers of Gamco, including General Counsel John Adams, have thoroughly reviewed Part 3. We fully understand and will comply with this section of the RFP.

We appreciate the Lottery's length of contract determination, five years plus two, one year extensions. This is a very large, complex project with many new and as yet, undeveloped components that will take significant periods of time to properly execute and maximize.

The Lottery has worked with Gamco for over a decade, and through the course of our commerce, we have become most familiar with all facets of your business. Gamco's product quality, service, security, systems and programs have been experienced by many, many Lottery employees over the years.

This comfort level of experience and knowledge can only make the transition into this project that much smoother and successful.

Regarding sections concerning "Intellectual Property," "Trademarks," "Warranty and Indemnification," "Contract Relationship," and "Indemnification," General Counsel Adams has specifically reviewed and discussed these with us internally. We will be in full compliance with any and all of these sections.

Chief Financial Officer Robert Koory has personally reviewed sections concerning "Insurance," "Bonds," and "Letter of Credit." Again, we will be in full compliance to all sections.

4.2 Experience

International Gamco, Inc. ("Gamco") is the nation's premier manufacturer of pull-tab tickets. Incorporated in 1983, Gamco is headquartered in Omaha, Nebraska, with regional sales offices in the states of Washington, Illinois, Texas and Louisiana. Through the years, Gamco has grown into a multi-faceted manufacturer and marketer of pull-tab ticket products for the lottery, charitable gaming and promotional games markets. Gamco sells its pull-tab games to charitable gaming markets in 40 states, Canada, Latin America and Europe. It is specifically licensed as a manufacturer in approximately 20 jurisdictions and operates under a high level of scrutiny and security. Currently, Gamco holds a contract to provide pull-tab tickets to the Idaho Lottery, Missouri Lottery, Oregon Lottery and Connecticut Charitable Games Division and with the Massachusetts Lottery to supply pull-tab tickets to charitable gaming venues. As an exclusive pull-tab ticket subcontractor and marketing partner to Scientific Games International, Inc., Gamco also supplies pull-tab tickets to the Kentucky Lottery Corporation, and the Indiana ("Hoosier") Lottery. Gamco has worked successfully with these lotteries to market and enhance pull-tab ticket sales.

A privately held corporation, owned by Phillip J. Glassman, Gamco employs approximately 220 people. Gamco is proud of the dedication and longevity of its employees and the family/team atmosphere that has been created as our corporate culture.

Gamco has 25 years of experience printing and providing pull-tab tickets to Lottery, charitable, and promotional games markets. Through innovation and state-of-the-art manufacturing, Gamco produces pull-tab ticket games of the highest quality. Gamco's ticket manufacturing takes place in the nation's most secure, technologically advanced pull-tab manufacturing plant consisting of over 80,000 square feet. Within this facility all aspects of game design and

manufacturing take place. All art, layout, design, film, plate work, printing, manufacturing, and storage are done in-house. All tickets meet or exceed the standards dictated by the North American Gaming Regulators Association (NAGRA) and the National Association of Fundraising Ticket Manufacturers (NAFTM). Members of our staff in fact, have been past officers and directors of both NAGRA and NAFTM and were involved in the drafting of pull-tab standards.

Unique and creative ideas set Gamco apart from other pull-tab ticket manufacturers. Gamco pioneered many of the industry's significant game developments such as: criss-cross play, secondary forms of winner verification, bar-coded tickets and systems, seal card games, "ScratchTabs™", step-up games, progressive games and keno and bingo "event tickets". Additionally, Gamco pioneered the development of "electronic tickets" through its Oasis Gaming division.

In October of 1997, Gamco acquired the assets of Scientific Game's pull-tab ticket facility in Albert Lea, Minnesota. This facility manufactures charitable pull-tab tickets primarily for the Washington, North Dakota and Minnesota markets. The facility manufactured lottery pull-tabs under SGI for the Kentucky and Oregon lotteries.

Gamco is recognized as an industry leader in the marketing, and sales of pull-tab games. Members of our staff bring years of such experience not only from the lottery and charitable gaming industries but also from advertising agencies and corporate sales and marketing departments specializing in consumer and package goods. Our expertise is found in the areas of research, product design, marketing, sales techniques and retailer selection.

4.3 LITIGATION AND INVESTIGATIONS

International Gamco Inc. does not believe that any pending or threatened litigation, administrative or regulatory proceedings or any similar matters would affect its ability to produce and/or deliver the desired products or services. In the interests of disclosure, however, Gamco hereby lists, discloses, and summarizes all pending litigation.

- International Gamco, Inc. v. Multimedia Games, Inc., Case No. '04 CV 1053 J (AJB), U.S. Dist. Ct., Southern Dist. of California. International Gamco Inc. ("Gamco") filed a

Complaint against Multimedia Games, Inc. (“MGI”) alleging that MGI has infringed upon patent rights held by Gamco in the state of New York regarding U.S. Patent No. 5,324,035. MGI has filed various counterclaims and the litigation is currently in the discovery phase. Mediation is scheduled for May 30, 2008.

- Jeffrey A. Siggins, et al.v. Thomas J. Vilsack, et al., Case No. EQ CL 53324, Iowa District Court for Polk County. The plaintiffs allege various constitutional and contractual claims surrounding a change in state law which closed the Iowa Lottery’s TouchPlay program. International Gamco Inc. and other parties intervened in the litigation in December of 2006. Mediation is scheduled for April 16, 2008.

Should the Lottery desire, Gamco would be happy to provide any further information or answer any questions regarding this litigation.

Furthermore, International Gamco Inc. hereby states that neither it nor any of its owners, officers or primary partners has ever been convicted of a felony or other criminal offense (other than a minor traffic violation).

Moreover, International Gamco Inc. has never filed any bankruptcy or similar proceedings and no such proceedings have ever been filed against it.

It is understood that disclosure of the information discussed above is a continuing statutory requirement that must be disclosed to the Lottery in a timely manner.

4.4 FINANCIAL VIABILITY

The audited financial statements for the last five years, along with the current certification by CFO Robert Koory, co-signed by President Phillip Glassman, are found in the Appendix (sealed envelope), as detailed in “a.”

These documents are or have been prepared in accordance to the Lottery’s guidelines in this section.

We understand and will comply with “b.”

4.5 CHANGE IN FINANCIAL CONDITION

CFO Robert Koory has reviewed this section. We understand and will comply with details and guidelines set forth.

4.6 HISTORY OF CONTRACT PERFORMANCE

Within the past three years, Gamco has been awarded lottery pull-tab ticket contracts for the Massachusetts, Connecticut, and Missouri Lotteries. Gamco has received contract extensions from the Missouri, and the Massachusetts Lottery. All contracts are currently in force and none of these contracts have been terminated. Gamco's pull-tab contract with the Oregon Lottery expired in 2005.

Through its partnership with Scientific Games International, Gamco, as a subcontractor currently supplies pull-tab tickets to the Kentucky Lottery and Indiana (Hoosier) Lottery. Scientific Games International's Missouri Lottery pull-tab ticket contract expired June 1, 1998. Both the KLC and Hoosier Lotteries have extended their contracts in the last two years.

Listed below are some of Gamco's clients we have provided products and services for the last three years:

Massachusetts State Lottery Commission

"I would like to take this opportunity to thank Mr. Mark Stevens and his Associates at International Gamco, Inc., for their superior knowledge of the Charitable Gaming industry. Together, beginning in 1995 and continuing today, we revamped our entire product line and introduced entirely new concepts and games. I have experienced with the folks at Gamco an unsurpassed level of cooperation, enthusiasm and dedication. They truly excel in the area of customer service."

Phone: (573) 751-4050
Fax: (573) 751-5188

As the Missouri Lottery's Pull-Tab Product Manager, I have had the pleasure of working with International Gamco as our Pull-Tab printer since 2005. I have found Gamco to have a solid reputation, experienced employees and a quality product. I would recommend International Gamco as a Pull-Tab printer for any lottery.

I have enjoyed working with all of our account representatives including: Mark Stevens, Fred Colanino and Aaron Mancilla. During the past six months, I have experienced health problems resulting in time away from my job. During this time, Gamco's staff really stepped up to the plate. They stayed very organized to ensure everything ran smoothly while I was out.

*Shay Shoemaker
Product Manager
Missouri Lottery*

Connecticut Lottery

Newington, CT 06111-1523
Phone: (860)-594-5480
Fax: (860)-594-5494

No contracts that Gamco has been awarded either directly or as a subcontractor have ever been terminated prematurely in the last four years or at any time during our history.

4.7 DISQUALIFICATION FOR FINANCIAL INABILITY AND BUSINESS STABILITY

CFO Robert Koory has reviewed this section. We understand and will comply with details and guidelines set forth.

4.8 VENDOR'S STRENGTHS

Part 6 details the many unique aspects and advantages International Gamco offers to the Idaho Lottery in relationship to the Pull-tab Services Program. To summarize some of these strengths, we offer the following examples we feel are significant in meeting the Lottery's objectives:

---In the decade-plus we have worked with the Idaho Lottery, we have come to know not only the market, but its potential. In working with the Lottery and through primary and secondary research Gamco has done in this market, we feel we are uniquely qualified to be the selected vendor for this Program.

---Gamco's marketing and sales, warehouse and distribution, service and reporting as well as our manufacturing strengths have been honed for 25 years, in over 40 markets in North America. We have literally hundreds of years of pull-tab experience combined in the professionals who will plan, build and execute the Pull-tab Service Program for the Idaho Lottery.

---The consistent quality of Gamco's pull-tab products, and its dependability and reliability in the market place, are legendary in the industry.

---Gamco is known as an innovator in terms of product play-style. We build games people want to play, again and again. Additionally, we are committed to promotion on all levels of the product in the marketplace to achieve maximum product placement, as well as sales.

---The Pull-tab Service Program is a unique approach to marketing pull-tabs. We fully understand it, we are fully committed to it and we have been working toward this very model for a number of years. The opportunity here is great for increased and on-going revenue generation for Idaho, and the Program can be a blueprint for other progressive Lotteries.

---Finally, from our years working with the Idaho Lottery, we feel we have a strong bond of partnership, understanding, trust and commitment that runs both ways. In our opinion, there is no better foundation on which to begin a program of this magnitude with.

4.9 APPROVAL OF VENDOR EMPLOYEES

Individual resumes of key personnel who would be involved in this Pull-tab Services Program are detailed as follows in this section, along with organizational and staffing charts. Any additional information the Lottery desires will be furnished on request.

PART 5:

SECURITY

5.1 Approach to Security

International Gamco shares the same philosophy with the Idaho Lottery that security and integrity of our products is of the utmost importance. For every Pull Tab made, International Gamco employs an overall security plan which addresses every phase of the manufacturing process including plant security, Pull Tab ticket construction, reconstruction security, anti-counterfeiting techniques, validation security, redemption security and game design security. As more fully explained in Gamco's response to the following sections, our security plan describes methods we use in the construction of Pull Tabs to avoid "marking" or "pick-out" problems.

International Gamco recognizes that security and integrity are the foundation of a successful lottery and we are firmly committed to the security required to preserve the integrity of this product. Because Gamco believes that our lottery customers must be assured that we have the capability, procedures, controls, and integrity necessary for the full security of the Pull Tab product, Gamco has demonstrated a constant vigilance against any breach of security and Gamco's security plan has been refined for over 24 years of Pull Tab game manufacturing for lottery and charitable customers. Our security plan and related procedures will continue to evolve over time to address any and all threats to security.

5.2 Building Security

The Idaho's Lottery Pull Tab Tickets will be printed at International Gamco's Omaha, Nebraska facility. Gamco has supplied a building floor plan as an attachment.

Visitors, vendors, or any third parties must enter Gamco's facility through the main office entrance only and sign-in before being issued a visitors' badge and escorted to their destination. Records of all entries and exits from Gamco are available upon request. All other exterior doors are locked and equipped with a Northern Integrated Facility Management System. Entry to the building is gained by passing an assigned security card through a card entry reader. Each card is programmed into the system with an access level to restrict

access to specified locations or to specific hours, days, or weeks. The exterior doors are also equipped with an alarm system monitored by ADT Security Services, Inc.

Gamco's manufacturing area is enclosed in concrete block with no exterior windows or skylights. Fire doors are integrated into the alarm system and the system is monitored by ADT Security Services, Inc. (ADT is used to monitor intrusion, fire or flood and is monitored 24 hours a day, 7 days a week.) Gamco's facility is compliant with all federal, state and local fire and safety regulations.

Gamco's receiving and loading docks are entered by ringing a bell from the outside and entrance is gained by personal escort. One-way locked doors keep visitors contained in an office. Access to the shipping area is gained by signing in and wearing a visitor's badge. The dock doors when not in use are wired to the alarm system and monitored by ADT Security Services, Inc.

All Gamco employees are issued identification badges that restrict their access to their appropriate work areas.

Motion detectors and an array of exterior and interior cameras (CCTV) monitor and record all activities at entrance/exits, and other high security/sensitive areas 24 hours a day.

All Idaho Lottery products will be stored and locked in a restricted area. This area is enclosed on all four sides, three sides by concrete block with no entry point and one side by chain link fencing, with one locked entry point. A security camera monitors and records this area 24 hours a day.

Gamco's shipping docks will be closed and free of any other shipments, deliverables, trash, etc. during loading of Idaho's Lottery Pull Tab tickets. The shipping manifest will be made up and pallets of finished product loaded pursuant to the Lottery's request. The manifest will be signed by both the approved driver and the Gamco employee loading the truck and finally the truck will be sealed and the seal number recorded on the manifest. Once the dedicated truck arrives at the Idaho warehouse a Gamco employee will confirm that the seal is intact and the product has arrived securely. The product will be check for condition and accuracy against the manifest and put on racks. Should something look amiss the Gamco employee in Idaho

will call Gamco's Security Director immediately and he in-turn will notify the Idaho Lottery Director.

International Gamco understands that all costs incurred as a result of implementing additional security measures shall be Gamco's responsibility and that the Lottery shall have the right to make any number of announced or unannounced inspections of our facility at any time.

5.3 Game Security

All of International Gamco's Pull Tabs tickets meet or exceed the standards dictated by the North American Gaming Regulators Association (NAGRA) as well as the National Association of Fundraising Ticket Manufacturers (NAFTM).

Gamco employs the following standards, procedures, and production techniques to prevent compromise of ticket security including anti-counterfeiting, game design security and redemption security:

Pull Tab Ticket Construction Security

- Opaque Paper - Ticket back paper stock is 12 point Newark Pacific Domino CGT Duplex black/white high opaque security board. This product is made from 100% recycled fiber and 50% post consumer material and has a clay coated finish. Newark stock is opaque and symbols may not be viewed or determined from the outside of the ticket using a high intensity lamp of up to and including 500 watts, with or without utilizing a focusing lens.
- Die Cutting - All Newark security board is purchased in rolls and printed, die-cut and sheeted on International Gamco's 18-inch Webtron eight-color flexographic web press before sheets are glued. Die cutting before gluing allows Gamco operators to insure proper registration of die cut windows to printed symbols. It also allows our Quality assurance to open full die cut sheets to make sure every window is clean cut and opens well. International Gamco has never utilized the "kiss cutting"* method that most, if not all, of the other Pull Tab ticket manufacturers utilize.
- "Kiss cutting" - is an industry standard method of die cutting the window openings after the front and back sheets are glued

together. In this practice, it is virtually impossible to keep the die from penetrating through the index and into the front ply, thus causing a tendency for certain tickets to be marked and the inside of the front ply to delaminate, or peel apart. This, of course, can lead to tickets accidentally being opened in normal handling. It can also lead to counterfeiting of tickets and a variety of other problems (e.g. cut and paste).

- Lamination - Gamco has two Autofeed Automatic Laminators designed exclusively for the Pull Tab ticket industry. These laminators securely bond the index to the front sheet by gluing all four sides and between the tabs in near perfect registration.

The laminator has a 3-point registration system (two head stops and a side guide) to insure positive registration control. In addition, this system incorporates an Out-Of-Registration detection system. These two systems eliminate out of registered symbols after the window is opened and windows from being glued shut. This process also uses printed glue lines on the symbol sheet combined with glue that is tinted blue to provide the operator with visual proofing.

Through extensive testing, Gamco has developed a dextrin/resin adhesive that securely bonds the face, or ticket front, to the index. It is not possible to separate the ticket front from the back without tearing or defacing the ticket.

- Printing – Gamco’s new six-color KBA press is ideally suited for pull tab production due to the computer-controlled adjustment of lateral, circumferential and diagonal registration and exacting inking and dampening units, which ensure consistent color and registration throughout a production run. The Rapida 105 uses a sophisticated online measuring system for control of the print quality called Densitronic. The slightest deviations in the color are recognized and corrected eliminating any color or printing variations.

International Gamco has installed drop ceilings over each press in order to minimize foreign material dropping into and contaminating the ink trains. International Gamco also employs a sheet vacuum system that cleans the sheet prior to

reaching the first printing unit to eliminate the possibility of "hickeys" which can mark tickets.

Security for the printing of lottery material includes locked cabinets for lottery printing plates and segregated waste skids for destruction of any lottery sheets. This would include make-ready sheets.

- Pull Tab Game Sheets Collation - Game sheets are collated on a German-built, 10 station Colly collator. Game sheets of the same type are loaded into specific stations for a predetermined collation pattern. These sheets can be selectively pulled or randomly pulled until a complete game is collated.

Each station is equipped with electronic sensors and detectors to guarantee accurate sheet selection. Game security and integrity is maintained through an on-board computer control developed by International Gamco engineers.

- Two-Way Slitting - Gamco has eliminated guillotine cutting completely due to the marking problems associated with guillotine cutting. Gamco engineers have designed and built several two-way slitting and serial numbering machines that guarantee each pull tab ticket in a deal will bear the same serial number and be all the same size without variations. Both eliminate possibility of marking tickets.

The system is capable of slitting a variety of ticket sizes. This equipment automatically feeds each sheet from the collated set and transports it down a conveyor where a laser scanner reads a bar code previously printed on the edge of the sheets. The bar code contains information as to the form number of the game and the sheet identification. For audit and quality control purposes, scanned sheets are compared to a database to insure accurate quantity and sheet type.

If a non-conforming or extra sheet is scanned, a gate opens and the sheet is "kicked out" of the set. An equipment monitor displays to the operator the reason why the sheet was rejected. During this process, each sheet of tickets is serial numbered by a proprietary numbering controller. International Gamco has three 9416 six-head Videojet™ ink-jet numbering systems, each dedicated to a different numbering and slitting line. The

Videojet™ controllers were designed by International Gamco and have numerous unique quality control features. The controller runs in an automatic numbering mode. When in this mode, the serial number(s) will increment when the sheet number for that set or deal equals the correct number of predetermined sheets needed. Every unit has its own unique serial number. These controls are extremely valuable because they will only serial number on the correct sheet and will not duplicate serial numbers. No serial number used on a deal of Pull Tab tickets is repeated on that form number within a three-year period.

An in-line labeling system is synchronized with the ink jet printer computer and sheet scanners. The data from the scanner computers and ink jet computer is combined to produce a label for the game box.

- Positioning of winners in box – Planned layouts distribute winners across many different sheet combinations. Proprietary random packaging procedures provide thousands of computer generated packaging which will eliminate packaging patterns and assure mixing of tickets within boxes. Quality Control charts winner placement to verify randomization.
- Accountability of secure waste material - Production personnel will monitor and log all secure Pull Tab tickets and sheets wasted during the manufacturing process. These Pull Tab tickets and sheets are gathered after each shift and securely transported to our in-house *Williams Crusher* pulverizer for destruction. The resulting unidentified waste is then evacuated by Gamco's waste removal system and baled for recycling. At the request of the Idaho Lottery a certificate of destruction will be available. Daily waste records for each piece of equipment are kept for at least three years.

Game Design and Pre-Press Security

- Game Design - International Gamco has been an industry leader in the use of electronic pre-press systems. We have over 24 years experience in using Macintosh computers and illustration software such as Adobe Illustrator, Photoshop and Quark Xpress. State-of-the-art hardware and software, utilized by our highly skilled illustration staff, result in high quality artwork that attracts players. Combining great design with

creative layout, along with attractive payouts, results in great selling games. Creative use of dayglo and metallic inks are also used to enhance the effect of a game.

- Pre-Press - International Gamco's pre-press department has invested in a state-of-the-art RAMPage digital front end that handles new game production. The RAMPage system is linked to our numerous Macintosh workstations thru a high-speed secure network. The reliability and advantage of our RAMPage system is in how it handles fully rastered digitized information (A raster image is a matrix of row and column data points whose values represent energy being reflected or emitted from the object being viewed.) This system is 100% secure and once a file has been approved and digitized it cannot change. Pre-press has two color plotters for creating composition proofs, point-of-sales materials and, with the use of Oris color control system, accurate press proofs. Computer to plate output is achieved through a Fuji Javelin plate setter, eliminating analog film and ensuring accurate reproduction of original art on press. Accuracy of any printing is only as good as the plates used. Digital information must be imaged in very tight tolerances. Gamco uses tight tolerances for measurement of ticket dimensions, positioning of symbols and location of die cut windows.

All pre-press work is done in-house with nothing leaving Gamco's secured facility.

Redemption Security

Besides meeting NAGRA construction standards involving validation security, Gamco offers differing levels of WINNER VALIDATION security as follows:

- CASHIER™ - Each winning Pull Tab ticket will have a CASHIER™ printed inside the tab that indicates the dollar amount won on that Pull Tab ticket. One example shown us that this form of verification and validation greatly facilitates the redemption of winning tickets and diminishes attempts to defraud the Lottery.
- GAMCOde™ - A unique winning number is printed inside a winning Pull Tab

GAMCODE SHEET
INTERNATIONAL GAMCO'S

This control sheet indicates the winning ticket numbers.

FORM 1234	GAME NAME
WINNER_CODE#	
\$100	12345

ticket that can be cross checked against a GAMCCode™ security card inserted in every deal box. This is another time tested method of retailer validation.

Pull Tab Reconstruction

- International Gamco provides a Pull Tab reconstruction service for validating questionable Pull Tabs which may have become damaged, or otherwise have a problem. In the event of a validation or reconstruction problem, Gamco would examine the Pull Tab. However, we recommend a claimed winning Pull Tab never leave the Lottery except under a strict prearranged agreement. Security in the reconstruction of a Pull Tab is the same security procedures used for making the Pull Tabs.

For each Pull Tab reconstruction, Gamco will provide a written report within five working days of the Lottery's request. International Gamco will keep a log of reconstruction requests.

Methods Used to Preclude "Pick Out"

All of International Gamco's Pull Tab tickets meet or exceed the standards dictated by the North American Gaming Regulators Association (NAGRA) as well as National Association of Fundraising Ticket Manufacturers (NAFTM). The following is a recap of methods used to preclude "pick out" of winning tickets.

- Games will be designed, constructed, glued and assembled in such a manner as to prevent the determination of a winning ticket without removing the tabs or otherwise uncovering the symbols as intended.
- Individual tickets, including non-winning tickets will contain unique patterns of numbers or symbols assembled so that no placement of winners or non-winning tickets exist that would allow the possibility of prize manipulation, or "pick-out."
- Winning combinations will appear randomly under any of the tabs. The symbol pattern will be such that a non-winning ticket cannot be determined until all tabs have been removed.
- Number patterns, plate layouts, collating, shuffling sequences and Two-Way slitting have been developed by International Gamco to insure totally random organization within each unit of a carton or deal.

- It will not be possible to detect or “pick-out” winning tickets from losing tickets through variations in printing graphics or colors.

Potential Security Problems

The following confidential report documents all known methods of compromising the integrity of the Pull Tab ticket. International Gamco has always been the industry leader in its efforts to eliminate these problems, and has utilized cutting-edge technology and refined manufacturing processes to address these concerns. Gamco’s rotary die cutting, two-way slitting and tamper resistant tabs are but a few of the innovations Gamco has pioneered. The following offers more detail by each department or specific step in the manufacturing process.

Confidential Report

Employee Background Checks

- All new employees are screened for felony and misdemeanor criminal history by an information screening service. Pre-employment and random drug testing is also conducted.

5.4 Laboratory Testing

Upon the Lottery's request, International Gamco will submit copies of our most recent and applicable test reports. These reports demonstrate the security of Gamco's Pull Tab tickets against compromise.

Gamco's final Pull Tab product will be tamper-proof by any practical means.

5.5 Breach of Security

International Gamco understands, if awarded the contract, that any breach of our security during the term of the contract, especially regarding theft or disappearance of any Idaho Lottery product will be immediately communicated to the Lottery Director of Security with written details.

5.6 Security Evaluation

International Gamco understands that its overall security plan and procedures must meet the Lottery's security needs and have absolute minimum possibility of fraud, tampering, theft, counterfeiting, alteration, or other security breaches.

5.7 Security Options

As demonstrated above, Gamco has made every effort to improve the security of the Pull Tab ticket and does not offer any alternatives for improvement at this time. As Gamco develops or learns of additional improvements, it incorporates them into the existing production process.

5.8 Production Tickets

International Gamco understands that the Lottery reserves the right to randomly select production Pull Tab Tickets manufactured by Gamco for testing by a laboratory of the Lottery's choice for the purpose of confirming that Gamco's production Pull Tab Tickets meet all the Lottery security requirements.

PART 6:

PULL-TAB SERVICES PROGRAM

6.1 Required Pull-Tab Services

Gamco fully agrees with the Lottery's assessment that the following services are not only required but mandatory for the success of the Pull-Tab Service Program. Gamco would provide:

- a. Pull-Tab Ticket printing
- b. Warehousing services
- c. Distribution of Pull-Tab Tickets
- d. Sales staff
- e. Vending products including installation and service
- f. Retailer recruitment
- g. Retailer training
- h. Marketing support
- i. Sales reporting

6.1.1 Pull-Tab Ticket Printing

Gamco has researched the Idaho pull-tab market from a historical perspective, as well as in comparison to other pull-tab markets in the US. We have drawn conclusions based on this research in terms of the types of play styles, price points, quantities and mix that will be necessary to take full advantage of the market.

Given the variety of venues we can offer product, from bars, lounges, taverns, restaurants, social and fraternal clubs to bowling centers and bingo hall to conventional Lottery sites such as convenience stores, a wide variety of product will be necessary for the market.

We will develop the product line and mix to attract a variety of players, while, over the course of time, continuing to drive the price point to the most advantageous level(s) to maximize our sales.

An uninterrupted supply of product is crucial to keeping the market moving ahead. We produce well over a billion tickets a year and have two fully functioning pull-tab manufacturing plants at our disposal. This gives Gamco an advantage in keeping inventory on track, to serve the market as we grow it.

See the Appendix for pull-tab catalogs and fliers on a variety on games.

6.1.2 Warehousing Services

International Gamco has vast experience in providing quality products and services to many Lotteries and Charitable market customers. For over two decades Gamco has warehoused and distributed pull-tab product with the goals of security, integrity, efficiency and accuracy. On a daily basis Gamco handles full truckload, LTL and numerous UPS shipments from two separate manufacturing plants and have owned and managed satellite warehouses in Omaha, NE, Albert Lea, MN, Everett, WA, Peterborough, Toronto CN, Mount Vernon, IL and Chatham, IL, as well as our facility in Bridgend, Wales, UK.

Gamco is prepared to establish, equip, staff, and operate a full-scale warehouse for the Pull-Tab Service Program. This secure facility would handle all aspects of the program from a central location. We have discussed in our planning sessions the use of satellite or regional warehouse facilities. We will address this as the program grows.

Additionally, Gamco is interested in working with Idaho Lottery in utilizing its current warehouse facility, equipment and personnel in this regard. If we can eliminate any duplication of effort in the Program we can better maximize our bottom-line revenue.

Our facility, in addition to handling the pull-tab product, must also provide a technical base for the staging, testing, market prep and repair of any and all vending equipment. We will also handle marketing, sales and promotional materials at said facility.

Break-Open Fulfillment System (BOFS) Warehousing/Distribution

Over the past 25 years, International Gamco has been an innovator in the pull-tab ticket industry. The most important objective when creating new technology for pull-tab tickets has been to constantly improve the security and integrity of the product itself. Gamco has accomplished this in many ways: from the manufacturing process, to warehousing and distribution, prize verification at the retail level, to systems that track and report on all aspects of the pull-tab product.

The **BOFS** is designed to provide up-to-the-minute tracking of all warehousing and distribution of Gamco's break-open tickets. **BOFS** is a technically-advanced system that will meet and exceed all the required functions for break-open games, including required functions for efficient warehousing and distribution of the break-open product.

Gamco's **BOFS** for break-open ordering, warehousing and distribution is designed to manage and account for product at all times and is expandable.

BOFS highlights include:

- An order entry program that provides salespeople with instant inventory availability screen and a substitution screen that suggests similar available product.
- Secure pick-tickets with product warehouse locations for efficiency and reliability.
- Excellent bar-code labeling of break-open packaging for security, tracking, tracing and accountability.
- Mobile (RF-using wireless security protocols) scanning computers that scan product barcodes and assigns customer identification to the scanned break-opens. Almost instantly updates inventory levels while creating an audit trail of product to customer.
- Simultaneous scheduling software that monitors finished break-open levels in warehouse to ensure adequate supplies.
- Over 2 decades of warehousing management experience.
- Decades of commercial and independent trucking company relationships.
- Full UPS capabilities including all real-time on-line tracking technology and UPS confirmation documentation of product acceptance.
- Secure digital storage of break-open manufacturing details through delivery of product and retained for as long as the lottery would request. All secure files have redundant back-up procedures.
- Proprietary report generating for specialized reports pertaining to active shipments, shipment history or real time manufacturing data.

Gamco will provide the efficiencies and economics of scale necessary to make this work for the Idaho Lottery.

As noted earlier in regard to warehousing, Gamco may utilize the Lottery's current facilities. With that being the case, we would work to integrate our systems with the Lottery systems, if possible.

6.1.3 Distribution of Pull-Tab Tickets

With the Pull-Tab Service Program, Gamco's management believes that distribution contact is one of the most essential of all the elements of the Program.

To this end, Gamco plans to run distribution routes within the state of Idaho.

This tactic is strategic from several angles. It provides:

- On site service.
- On site delivery.
- Sales opportunity.
- Promotional opportunity
- Dispenser service, as well as checking the status of the machines inventory. (Cardinal Rule of Pull-Tabs: An empty machine does not make money.)

As proven in many markets over time with this product, the route will deliver on many levels in terms of product success.

Gamco will be responsible for the delivery of pull-tabs to retailers throughout the State of Idaho. Our strategy will ensure that the distribution is effective, efficient, and secure, provides a satisfactory level of customer service to the retailers, and presents a positive image of the Idaho Lottery.

Tickets will be delivered to retailer locations within 24 hours after the order has been received from a retailer, a Lottery Sales Representative, a telemarketing representative or Lottery. Orders received by Gamco by 4:00 p.m., Monday through Friday, will be delivered to the retailers by the next business day. Exceptions to the 24-hour requirement may be granted for geographically remote locations as determined by the Lottery. All deals delivered to retailers are to be shipped in sequential order as nearly as practicable.

It is important to have a method for verifying receipt of ticket order (signature required) by the retailer from the delivery or sales person. International Gamco's Verification of Order Delivery:

Our proposed delivery procedures include documentation to confirm that the retailer accepted delivery of the tickets.

Our delivery procedure takes advantage of the technology used by United Parcel Service (UPS) to document confirmation that the retailer accepted delivery of the tickets. Delivery information is accessible at the warehouse via PC connection with UPS' on-line shipping and tracking system. UPS' real-time tracking technology is integrated into our PTFS system so that the signature of the person accepting the delivery is also available on-line.

Alternatively, Sales and Service Representatives will deliver tickets from truck stock. A signature will always be required on prepared forms showing the product delivered, time and date delivered, along with the signature of the retailer indicating receipt of the order.

Product Transportation and Security is Key

Gamco is very sensitive concerning the security and integrity of its methods of transporting tickets and products into the states where it does business. This is extremely important when focusing on the image our company and the Lotteries we do business with. The first level of the transportation process for break-open tickets is from Gamco's manufacturing plants in Omaha, NE and Albert Lea, MN. We only contract with secure carriers that are bonded and have a history of transporting sensitive product that needs to be protected. We ensure that all carriers we contract with have evidence sealed containers. We are confident that the product leaving our manufacturing plants has not been tampered with during shipment. It is imperative that we know the product shipped from our manufacturing plant to our warehouse in Idaho has the same integrity that it had when leaving our facilities.

The second level of the transportation process is from the warehouse in Idaho to the retailer. Gamco is able to maintain the same level of security in the transportation of its tickets to retailers, as it requires

from its manufacturing plant to the warehouse. We are able to ship product to the retailer via our selected delivery provider (UPS) in just 24 hours. Orders are processed through our customer service representatives, tel-sell staff or secure website and shipped for arrival to the retailer the very next business day.

This level of service is identical to the service received by Idaho Lottery retailers for the instant scratch ticket product line.

6.1.4 Sales Staff

A sales and service staff will be formed to handle the routes, site recruitment, customer service, ordering, ticket delivery, Tel-Sell communication, promotional activity and any additional needs that develop.

Developing strong relationships with our sites will be a primary focus for our Team. This relationship building will impact in getting optimum placement of the dispenser, the use of promotional materials, introduction of new games and keeping the dispenser well stocked with product.

While we will have individuals on the road running the routes, we will have an internal staff handling many of the afore mentioned duties, as well as backing up the field people.

There are several methods our company plans to utilize for retailers to place break-open ticket orders. It is important that whichever method a retailer chooses, it is quick, non-cumbersome and effective. The methods Gamco plans to employ are:

- Retailer can place orders by telephone to tel-sell personnel;
- Retailer can place orders via secure website;
- Tel-Sell personnel can contact retailers for orders according to contact schedule approved by the Idaho Lottery;
- Tel-Sell personnel and Sales Representatives contact retailers to suggestive sell existing and new tickets to Retailers. Through our Oasis Game Center (OGC) polling, our staff can suggestive sell tickets based on inventory information received from those sites that have dispensing devices; and
- Sales Representatives can fill orders during site visits with trunk stock.

6.1.5 Vending Products Installation/Service

International Gamco plans to implement its line of digital dispensing devices during its contract with the Idaho Lottery. The dispensers employ new technology for pull-tab tickets by promoting the product on a 17-inch touch-screen monitor. When the dispensers are not dispensing tickets, various animation sequences or attract modes, run on-screen to gain the attention and awareness of players. The animation sequences promote top prizes, game themes, play styles, etc. to entice players to purchase tickets.

These units can also be used to promote other Lottery products on-screen, as well as cooperative advertising and promotion

Another important technology afforded to Gamco's dispensing device is the ability to communicate with the Oasis Gaming Center, tracking sales, inventory levels, and possible malfunctions.

This technology is revolutionary in the pull-tab industry, and would serve to not only eliminate out-of-stock situations, but provide significant marketing reports and crucial data.

We have utilized this communications aspect in other markets for the Oasis Electronic Gaming Systems, and it has been very successful. The application here, we feel, would be most beneficial to the success of the program, if implemented. Although we don't plan to use this technology in the initial stages of this project, it is a technology that we would consider using later if the Idaho Lottery is interested.

**OASIS BREAK-OPEN
DISPENSING DEVICE**

“TabBOXX”

- **Sleek design with 17 inch Touch-Screen customer interface**
- **Creates additional product functionality to: attract customers, introduce new games, allows for the promotion of other lottery products, etc.**
- **Displays product info for venue staff as required, for example, dispenser malfunction, ticket refill, accounting information, etc.**
- **Serviced by fully qualified service teams state-wide**

International Gamco will have installation and service representatives located strategically in the state. These reps will also have as their responsibilities:

- Site recruitment
- Relationship building

- Customer service
- Promotional implementation
- Ticket delivery

It will be necessary to have in-house bench technician(s) to handle dispenser preparation and major repairs. We do not want major repairs to take place at the retail location. If for some reason a dispenser requires major repairs, Gamco will change out the dispenser with another fully functioning unit. The dispenser will be taken to the warehouse for our bench tech to make necessary repairs and prepare the dispenser to go back out into the market.

6.1.6 Retailer Recruitment

With well over 3,000 potential sites in the state, we will target the select areas and venue types, as we roll the product out in the state. Additionally, we will study the existing sites, their history and potential, to determine our best strategy in maintaining and growing those that have the where-with-all to be a significant pull-tab site.

The Interstate 84/86/15 corridor will undoubtedly provide the bulk of sites in the near terms as a result of population base in this area. We will, however cover the state, seeking the best possible sites, wherever they might be.

We will use a variety of methods to recruit retailers, including: direct site mailings, state trade shows and conventions (e.g. beverage shows and fraternal club conventions), tel-sell, as well as on-site contact to sign locations to the program.

6.1.7 Retailer Training

International Gamco understands that the Pull-Tab Services Program is only as strong as its weakest link. It will be imperative that all retailers carrying the Lottery's pull-tab product and dispensing equipment have thorough training on all aspects of the product.

Training will include full knowledge of each game offered and various play styles. When the dispensing machines are placed, full training will be provided to all retailer personnel available regarding ticket loading and cash collection, as well as simple maintenance for bill jams or ticket jams.

Much of the training may take place on-site, but we also envision having regional training seminars initially, as well as on-going seminars to keep the sites fresh, up-to-speed and motivated.

We have also discussed creating a retailer web site with new games, tips, product information, promotions, help screens, etc, as well as a possible newsletter.

As much communication as we can attain with our sites, the better program we will have built and the better revenue we will generate.

6.1.8 Marketing Support

International Gamco, Inc. plans to implement a full marketing campaign to bring attention to the pull-tab product placed in license retail locations. The marketing program includes advertising, promotion, Point of Sale, signage and incentive programs for players, retailers, and route personnel.

Naturally, our marketing plans will be in phases, as we do the initial re-launch of the product, the on-going recruitment, consumer promotion(s), retailer promotions(s), etc.

A full marketing plan will be developed and presented for approval by the Lottery before implementation of any programs.

6.1.9 Sales Reporting

Within this section, International Gamco describes its capability to provide a comprehensive cost and revenue statement weekly and/or monthly to the Idaho Lottery that details accounting information for all deals delivered to retailers during the period reported using our **Break Open Fulfillment System (BOFS)** as discussed in this proposal.

The **BOFS** supports processing, accounting and management for a multitude of various break-open games via our exclusive software and customized management system.

The **BOFS** data base produces customized reporting of all aspects of the break-open product. The **BOFS** incorporates all the necessary functionality to manage break-open games, including retailer accounting, warehousing, inventory tracking, distribution and tel-sell.

All reporting can be available to Idaho Lottery personnel through a secure website management system provided by International Gamco.

The system proposed conforms to and exceeds NAGRA record-keeping and reporting standards. It contains the internal control procedures necessary to track break-open deals by serial number and form number and is capable of providing all of the reporting detail required by such standards. The **BOFS** has been in use in several Lottery and charitable markets for break-open accounting and reporting.

6.2 Vendors Proposal

It is International Gamco Inc.'s objective to maximize the pull-tab potential for the Idaho Lottery by providing all aspects of the Pull-Tab Service Program, making it a truly turnkey operation for the Lottery.

To summarize from previous sections of this proposal the solutions, strategies and tactics to be employed to meet this objective are:

- Establishment of distribution routes to cover the State, providing sales, customer service, marketing support, product delivery and dispenser service.
- Establishment of a full service warehouse and distribution center that also provides customer and technical support, a sales and marketing office and reporting center for the Lottery.
- Development and maintenance of a full-scale pull-tab product line, designed to expand distribution through new sites, attract players, and maximize profits.
- Establishment of a sales, marketing, distribution and service staff to expand the market place for pull-tabs.
- Design marketing programs including consumer and retailer promotion, advertising, point-of-sales, signage and incentive programs for players, retailers and route personnel that meets Lottery approval.
- Provide state-of-the art pull-tab dispensers that are reliable, promotionally oriented, and player friendly.
- Provide a comprehensive plan for retailer recruitment and training, approved by the Lottery, and executed by the route representatives and Sales and Marketing personnel.

- Working with the Lottery, develop and provide on a timely and consistent schedule, all reports deemed necessary on sales, product line, sites, dispensers, recruitment and training.
- Operate this Program in a completely transparent manor, providing the Lottery with full access to all facets of our operations. Additionally, keeping on-going, open lines of communication with our partner, the Idaho Lottery.

6.3 Lottery's Oversight

International Gamco fully understands and concurs with this sections content. Gamco understands that it is operating under a contract with the Idaho Lottery to provide Pull-Tab Services and tickets.

All activity pursuant to this contract will be under the Idaho Lottery's guidance and oversight.

We view this Program, albeit turnkey in nature, as a partnership with the Idaho Lottery and the State of Idaho.

6.4 Order Tracking

International Gamco's procedures are as follows in the ordering and distribution of tickets. Our company is extremely focused on the need for security, integrity, efficiency and accuracy, and also on presenting a positive image of the Idaho Lottery. Gamco understands that all orders shall be placed directly with the Vendor. Fulfillment of orders shall be totally our company's responsibility and/or the responsibility of any Lottery approved Gamco subcontractor(s). We understand these services in their entirety, including, without limitation, warehousing and storage, packaging, transportation and delivery to the retailer.

International Gamco's Break-Open Fulfillment System (BOFS).

Gamco will work closely with the Idaho Lottery to ensure that all orders are tracked and adequate supplies of tickets are always available. We will do this by constantly monitoring inventory quantities and movement to prevent out-of-stock and oversupply conditions through Gamco's **Break-Open Fulfillment System (BOFS)**.

The **BOFS** allows International Gamco and the Idaho Lottery to track all tickets for a given game once the game has been loaded in the system at the time of manufacturing. The system can track by deal, carton, pallet, region, game, and retailer. Through an inquiry made at the **BOFS** management terminal, the system can report on any deal's status in real-time. The system maintains a complete history of each deal, including all changes to the deal's status from initial loading to the current date. A deal's status can also be changed on a need-to-know basis. Status can be updated for an individual deal, allowing the Idaho Lottery's Security staff to quickly classify break-open tickets as "stolen" or "lost".

The **BOFS** was designed to improve the physical flow of tickets, enhance ticket selection and distribution, and provide full accountability for all tickets received for a game. Gamco's **BOFS** system provides a complete trail of each deal and related tickets. A hierarchical approach is used to account for the specific status of each game within the manufacturing, transportation, warehousing and delivery process. The **BOFS** enables the Idaho Lottery to easily determine the status of each break-open game or deal throughout the entire manufacturing and sales process.

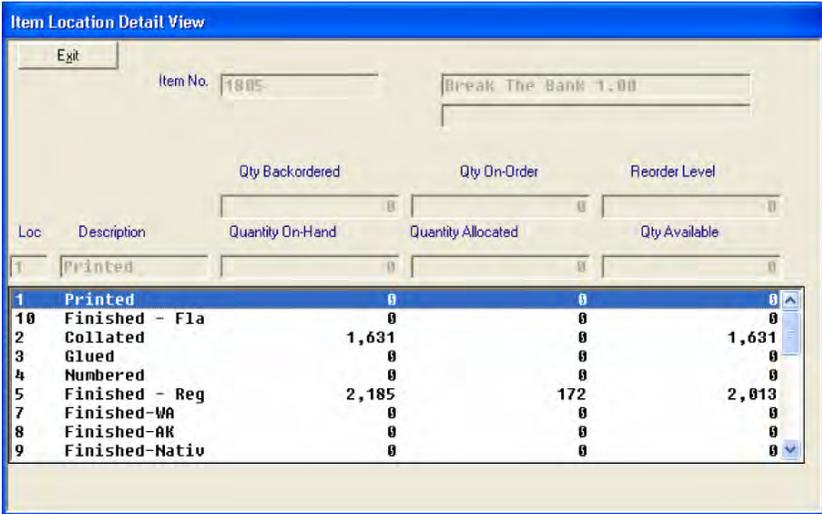

When an order is placed, the **BOFS** verifies existing inventory levels so as to ensure that there is sufficient inventory for the particular game(s). Otherwise, the **BOFS'** order screen displays an out-of-stock or inventory low message indicating that more inventory is needed. When an order is processed, the inventory balance and order files are updated in order to reserve the inventory requested.

The **BOFS** will issue an invoice with each order that shows the products contained in the order received and the amount due from the Retailer. The invoice can also include the date when the Retailer's bank account will be swept by the **BOFS** Electronic Funds.

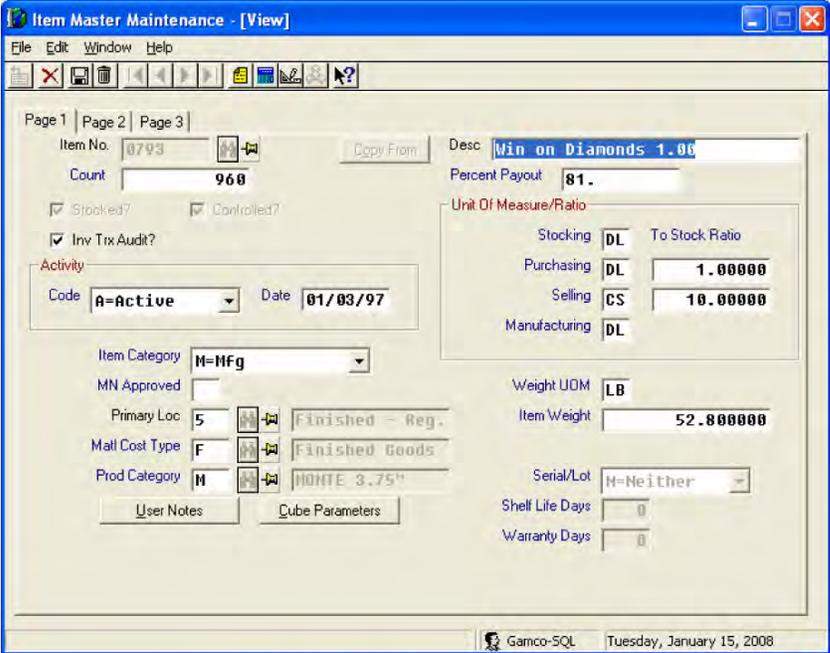

(Please note: Collection of funds due from the retailer has not been mentioned in this RFP. International Gamco has the ability through its BOFS system to collect pull-tab revenue from retailers and to remit the Idaho Lottery's portion of sales revenue to the Lottery on a weekly basis.)

PART 7: PRICING

7.1 LETTER OF TRANSMITTAL AND PRICE PROPOSALS FORMAT

The price proposal and signed submittal letter by the authorized individual for Gamco is contained in Volume 2 of the proposal, entitled "Price Proposal." The prices are valid for the requested 180 day period.

7.2 MINIMUM NET REVENUE GUARANTEE

Gamco has reviewed this section, understands and will comply with its details.

7.3 PULL-TAB SERVICES PROGRAM PRICING

Gamco's submitted pricing proposal follows the guidelines outlined in this section.

7.4 APPENDIX B—PRICING PAGE INSTRUCTIONS

Gamco has provided a worksheet model with the information outlined in this section in Appendix B.

PART 8: PROPOSAL EVALUATION

8.1 THROUGH 8.6

Gamco has reviewed Part 8 in its entirety. We understand what is laid out here and will comply with these guidelines.

(Continued from page 1)

Deployment of the TouchPlay terminals continued over the next twelve months and ramped up significantly in the later part of the period. In this time, three additional vendors received approval to participate in the TouchPlay program. By the end of the Lottery's 2005 fiscal year, the roughly 1800 installed terminals had produced approximately \$6.4 million in net sales.

As of early August 2005, three vendors have delivered TouchPlay terminals into the Iowa market. There were approximately 2500 TouchPlay terminals deployed across the state with average net sales of more than \$750 per week per machine. If the TouchPlay program meets the FY '06 goal, as it is currently on-track to do, it will generate \$20 million for Iowa state programs. This will represent more than 25% of total lottery contributions to state programs for the fiscal year. When you consider that this program is only three years old, it would be hard to call Iowa's TouchPlay program anything other than a stunning success.

PROGRAM DETAILS

Any company wishing to operate TouchPlay terminals in Iowa must apply to the Lottery, attend TouchPlay training, and meet a defined set of criteria. Once the Lottery grants a license to an operator, the operator must lease or purchase the TouchPlay terminals. The terminals can then be placed in Lottery approved premises. The Iowa Lottery requires that TouchPlay terminals must be placed in a Lottery-approved area that is easily monitored by the premises operator for security and age-compliance purposes.

Players insert money into the TouchPlay terminals as they do with any other vending machine. An on-screen counter displays the amount of money available for the player to purchase "tickets." As each ticket is purchased, the price is debited from the player's bank and the machine's monitor displays the results of the ticket while entertaining electronic tones indicate whether the ticket has won a prize. Any prizes won are credited back to the player's bank.

When the player is done, the terminal will print a ticket for the total amount the player has accumulated. Players redeem tickets of \$600 and under at the business where the machine is located. Prizes above \$600 must be paid at one of the Lottery's regional offices.

PROGRAM BENEFITS

New Source of Revenue

By mixing the architecture and characteristics of traditional paper pull-tabs and scratch tickets with the excitement of playing an electronic game, a Monitor Vending Machine (MVM) program, like TouchPlay in Iowa, can attract a whole new set of Lottery players. This allows Lotteries to generate additional revenues without significantly cannibalizing their other products.

New Lottery Venues

Administering the MVM terminals requires minimal effort from premise staff. For this reason, they are well suited for deployment in bars and other non-traditional Lottery venues.

OASIS GAMING

For the past 14 years, Oasis Gaming has been producing MVM and similar gaming systems for lotteries, charitable gaming, casino, and club markets throughout the world. And it was this wealth of experience that appealed to Iowa Lottery officials when they selected Oasis Gaming to help develop the TouchPlay concept.

Since the launch of the TouchPlay program, Oasis Gaming has contributed more than any other vendor to the success of the program. As of early August 2005, Oasis has deployed more than twice as many TouchPlay terminals as it's nearest competitor. In addition, Oasis Gaming brings expertise and services to the market that our competition simply cannot match.

Security & Reliability

The TouchPlay games from Oasis are controlled by a highly-secure central system. Since the beginning of the TouchPlay program, our system has proven to be extremely robust and reliable.

Accessibility

Lottery officials can access data from any Oasis TouchPlay terminal through a secure web interface. In addition, Oasis provides weekly summary reports in an electronic format designed to be readily imported into the IA Lottery's central database.

Creativity

Oasis develops highly satisfying games designed to attract players and keep them coming back.

A LOTTERY \$UCCESS STORY BY OASIS GAMING: TOUCHPLAY™ FROM THE IOWA LOTTERY

In 2002, Dr. Ed Stanek, Director of the Iowa Lottery, recognized a sizable opportunity for the lottery in the growing popularity of interactive entertainment devices. By combining the multi-sensory experience of playing an electronic game with the immediate gratification of traditional paper pull-tabs and scratch tickets, he believed the lottery could attract and hold the attention of a whole new group of lottery players.

In November of that year, to begin the realization of Dr. Stanek's vision, the Iowa Lottery put out an RFP for machines it described as pull-tab vending machines with video monitors. Three vendors responded to the RFP, and were subsequently approved to participate as the program moved forward.

Unlike any of the Iowa Lottery's existing programs at the time, the TouchPlay program called for the Lottery to partner with amusement operators from across the state. Because the operators would own or lease the terminals, the start-up costs for the Lottery would be significantly lower than they otherwise would have been. In addition, because the operators would do all the placement and maintenance of the terminals, the time frame for the initial roll-out would be much shorter than the Lottery could accomplish on its own.

In May of 2003, the lottery began a limited field-test for the TouchPlay program. For the test, a small number of terminals were placed within Iowa businesses already selling traditional pull-tab tickets. All three of the originally approved vendors participated in the test.

The field-test proved that players were interested in the TouchPlay games and that the Lottery had the ability to monitor and manage a statewide network of terminals. After twelve months, it was declared a success.

In May of 2004, the Lottery granted the first TouchPlay licenses and the operators started to deploy the terminals across the state. Two months later, at the end of the Lottery's 2004 fiscal year, the roughly 200 installed terminals had produced more than \$1.5 million in net sales.

Your E-Tab Solution™

The Oasis Electronic Pull-Tab Network

Presenting the dynamic and innovative Oasis Electronic Pull-Tab Network The next generation of the pull-tab is here!

By combining the traditional paper game with cutting-edge technology, Oasis Gaming has upgraded the familiar pull-tab into a multimedia entertainment experience.

The Oasis Electronic Pull-Tab dispenser will not cannibalize existing paper pull-tab sales. Instead, electronic pull-tabs provide incremental sales for charities by appealing to new players that prefer a more engaging audio/visual experience. Upgrade your player's pull-tab experience with the Oasis Electronic Pull-Tab Network and benefit from our proven technology.

Trustworthy: All levels of game integrity and security have been tested and approved by an independent laboratory.

Accountability: Remote machine monitoring provides near real-time access to inventory availability and sales data.

Player friendly: Using a video touch-screen, the player "opens" the tabs of the on-screen pull-tab, just like they would with a paper ticket.

Inventory Control: Out-of-stock and excess inventory are a thing of the past.

Game Variety: The Oasis game catalog contains an ever growing selection of games featuring striking graphics and engaging sound effects. Pull-tab games on the Oasis dispensers can be easily changed to avoid player burn-out.

OASIS TOUCH TAB™ MVM

MVM stands for **Monitor
ending Machine!** Although,
you may be
calling it your **Most Valuable
Machine** on site after you see
what it brings to the plate!
The **Oasis Touch Tab™**
MVM brings you an
innovative, dynamic
gaming experience,
at the touch of your
fingertips!

Outstanding In Our Field...

If we were to pick one
word to describe this
unique product, it would
be **"more!"**

Oasis Gaming®, a division
of International Gamco,
creates **more** new games,
with **more** variety, leading to
more player
choices, and **more** player
traffic! And, the **more**
machines you place, the
more your sales will
increase!

If We Build Them, Players Will Come...

Oasis Gaming, along with its partner
International Game Technology
(IGT), team up to field the best
product in the market. **IGT** is world
renowned in the gaming industry for
producing high quality, and player
preferred gaming equipment! It is
our team's dedication to
providing you with the best MVM
that will make **Oasis Touch Tab** *the*
player's choice!

Menu Screen (Top Center)
Main Game Screen (Lower Left)
Second Screen Feature
(Lower Right)

Ease Your Pain...

Here's how we make your
MVM experience easy and
painless. The Game Center
sends ticket packs via a
telephone line or wireless
connection to the **MVM** at
your location. **Oasis Gaming**
guarantees your ticket
inventory is always stocked;
you never run out. You are
billed as the tickets are sold!
Excess inventory becomes
a thing of the past.
And, we ensure you are
always up and running
smoothly!

Dreams Do Come True...

Oasis Gaming takes pride in
having the most visually stunning
and entertaining product on the market.
Players experience state of the art
games in an on-screen format.
Oasis Gaming is continually updating its
library of games, offering you a
significant menu of options.
Our games have spectacular
graphics, a variety of themes and
play styles that are sure to draw new
players to your venue. Many of the
games **Oasis Gaming** offers have
exciting secondary features that increase
the player's entertainment value, and
increase revenue at your site.

We Go The Distance...

As the gaming industry continues to
grow more competitive, **Oasis Gaming**
and **IGT** will continually offer you and
your customers **more!**
With **"Oasis Touch Tab MVM"**,
you'll ask *"Is this heaven?"*

No, it's the
Iowa Lottery!

THE OASIS TOUCH TAB™ MVM

19" Super VGA Touchscreen Monitor. Supreme clarity monitor displays brilliant graphics with interactive animation and CD quality sounds!

Reliable, easy to load, thermal printer with 4,000 ticket stack capacity!

Electromechanical Meters

High security bill validator with lockable, removable stacker.

The TabBOXX™

Multimedia Pull-Tab Dispenser

Oasis Gaming, a leading technology provider to the Lottery and Charitable Gaming industries, proudly presents their latest innovative product:

Specifications:

Height-845mm(33.25in)
Width-660mm(26.0in)
Depth-245mm(9.6in)
Weight-27.22kg(60.0lbs)

With TabBOXX™, pull-tabs sell themselves. A large 17" flat-screen monitor creates a dynamic Point-of-Sale display. In addition to promoting the tickets available for sale on this new-age dispenser, the display can also advertise other Lottery or charitable gaming products. Players use the simple and intuitive touch-screen controls to learn about the games and purchase pull-tabs.

TabBOXX™ Brings New Life to Pull-Tabs. The engaging sounds and animations displayed on the vibrant LCD will attract new pull-tab players. Game-specific animations and sounds help call attention to the newest pull-tab tickets.

TabBOXX™ is designed to be extremely easy to maintain and operate - just refill the ticket stackers and collect the cash. Detailed accounting data is available on-screen to make reconciliation a breeze.

Call today and start boosting your Pull-Tab Sales with TabBOXX™

9136 Mormon Bridge ~ Omaha, NE ~ 68152 ~ 800-270-8205 ~ <http://www.oasisgamingusa.com/>

As the competition for the gaming dollar becomes keener, Lotteries around the world are constantly searching for more efficient and effective methods to increase sales.

In the instant scratch ticket arena, the battle cry is *more* new games...*more* variety...*quicker* turnaround on new games... and *multiple* game offerings.

It's a proven fact that introducing more and more new games increases revenues. But it's leaving the Lotteries on the runaway carousel:

More games...smaller runs. More game designs... increased costs.

More retailer accounting headaches.

Increased deliveries.

Less and less time for pre-testing games.

More game intros...more deadlines.

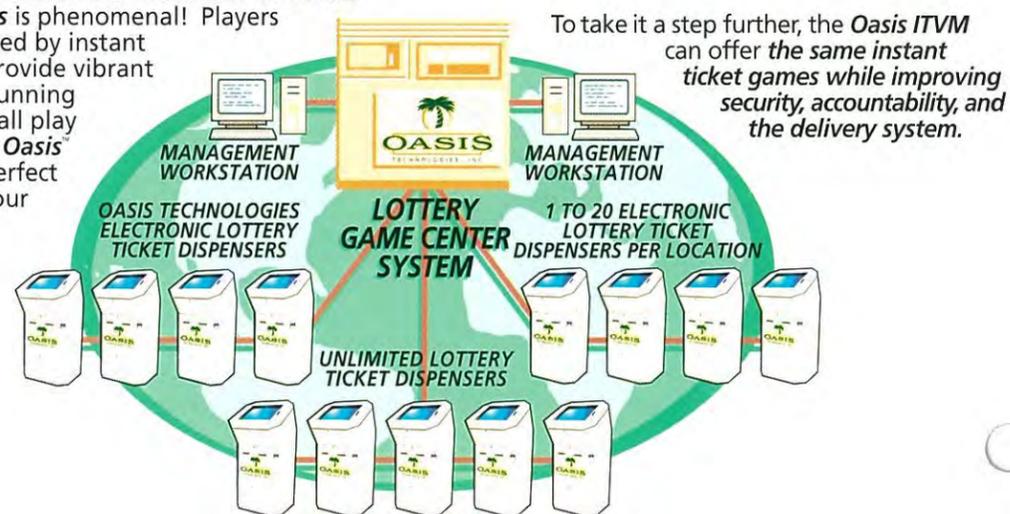

*Inventory, inventory, inventory!
And the carousel speeds on.*

BUT WHAT IF...

...you had no physical product deliveries; no inventory; no run quantities to agonize over; no retailer accounting headaches; new games virtually within days of concept; and superior game integrity and security?

It's available today. It's called the *Oasis*[™] **Electronic Network**. And with it you can take scratch tickets where they have never been before. *Oasis*[™] can operate in your traditional lottery retailer locations, as well as offering your product in non-traditional lottery locations, like bars and nightclubs.

It is similar to a mechanical ITVM, but offers the ticket on the screen. The churn rate of tickets through *Oasis* is phenomenal! Players are now excited by instant tickets that provide vibrant visuals and stunning audio — overall play stimulus. The *Oasis ITVM* is the perfect addition to your product mix.

Oasis allows lotteries the flexibility of adding a new product without cannibalizing existing products. Test site data has shown that when *Oasis* is placed next to instant tickets, sales of the paper product remain the same or increase over time. *Oasis* is additional revenue to your bottom line!

Oasis is the lottery product that will revolutionize the scratch ticket industry. *Oasis* offers players the traditional scratch ticket **with the same prize structure, same game themes, and same method of play** — only the results are better! Nothing has been changed — only the delivery system of the ticket — it's dispensed on a video screen!

SECURITY

Oasis has been tested and approved by an independent laboratory which tests devices for integrity and security on behalf of lotteries around the world.

ACCOUNTABILITY

Oasis allows you to monitor retailers from your office. By giving you the ability to poll each of your retail locations, you will know at a moment's notice: sales results, available inventory, market trends, and shelf-life of the product.

DELIVERY SYSTEM

Oasis ends the cumbersome warehousing and delivery of products to your retailers. Tickets are simply down-

loaded via modem from a Game Center that is located in the lottery headquarters to a retailer's site. Out-of-stock situations are virtually eliminated. Excess inventory is a thing of the past!

Oasis gives lotteries the marketing flexibility they need to monitor a products' acceptability in the marketplace without having to be obligated to millions of printed tickets. *Oasis* also allows lotteries to niche-market holiday, ethnic, and community game themes.

The *Oasis ITVM* is not a VLT. VLTs place lotteries in the dangerous position of offering games that may not be accepted by the general public. Studies show that video lottery can seriously affect the acceptability and image of the lottery to its playing public. This has been evidenced by

Characteristic:	Slot Machines or Video Lottery Terminals	Instant Ticket	OASIS ITVM

Player Vs. Player (Non-banking)	No	Yes	Yes

several referendums in states that have video lotteries. The referendums have asked for the lotteries to abandon their video lottery projects.

Oasis is different than a VLT and acceptable where a VLT is not, because:

1. Players compete against each other, not against the machine or house, as in VLTs or slot machines.
2. *Oasis* offers instant tickets that have the same themes, prize structure, and win ratio as your current best-selling scratch games.
3. *Oasis* is a network of electronic ITVM dispensers, linking multiple players to the same game.
4. *Oasis* is not an expansion of gambling, but a line extension of your current scratch tickets, using new technology to deliver tickets to the players.

Advantages abound for the Oasis ITVM over the paper lottery scratch ticket:

- *Oasis* is a computer-linked delivery system for the scratch ticket, so there is little or no human intervention that can create honest mistakes or even intentional fraud.
- On-the-spot reporting gives you the information for reports and statistics needed for questions posed by legislators, commissioners, or the general public.
- There is no chance of counterfeiting a computerized ticket on a video monitor. Winning tickets are printed for players to be redeemed by the retailer. Each ticket has a validation number to ensure it is legitimate and has not been altered by a player.

The *Oasis ITVM* answers today's tough question facing lotteries around the world: How to stay ahead of increasing competition as gaming continues to intensify. *Oasis* has arrived at this crucial time to bring the instant scratch ticket into the next century. With *Oasis* you can bring the future of the instant ticket to your lottery — now!

Quantity of Order

- Tickets: 1,002,240—this order will total 348 deals / 87 cases (+/- 5%). Gamco typically overruns each job 5%. Gamco will ship with each order all overrun deals, not to exceed 5% of the order. Gamco will inform the Lottery of the exact number of deals shipped with each order, and will not ship any order without contacting the Lottery.
- Each order will be shipped pre-paid LTL common carrier to address supplied by the Lottery.
- One "VOID" deal, samples, will be sent to Joe King at the lottery office.
- Disk with ticket art work will be sent to Joe King at the lottery office.

Price of Order

Production Schedule

1. Receipt of signed working papers	11-7-07	
2. Print sell in sheets.	11-23-07	
3. Print fronts	11-23-07	
4. Print backs	11-30-07	
5. Print flares.	11-23-07	
6. Cutting	12-5-07	
7. Collating	12-11-07	
8. Gluing.	12-13-07	
9. Serial number & slit	12-17-07	
10. Ship.	12-20-07	Delivery 12-27-07

Upon receipt of working papers, Gamco will follow this schedule. Some items may print & finish earlier. Gamco will notify the Lottery if product is available for shipment.

Ticket / Case Numbering Information

- Each deal will have a unique seven-digit serial number on the ticket front.
- Serial number range for this order is 0000001 thru 0000348.
- Prefix to serial number will be the game number, which will be a two or three digit number, for this game it will be 582.
- Suffix to serial number will be "-A."
- A one digit header flag of, 1 = good and 0 = omit (ex. 58200000011).
- Each case will be numbered consecutively.
- A shipping report will be supplied with this order listing all serial numbers and case numbers, with omissions indicated.
- Serial numbers of re-runs will start one number above the last serial number of the previous run.

246MO MISSOURI LOTTERY

117 WINNING COMBINATIONS IN 612 TICKETS • AVERAGE CHANCE OF WINNING IS 1 IN 5.23

International Gamco Manufacturing Procedures
Missouri Lottery Hand-Seed Games

Placement of the (15) hand-seed tickets will be determined using a random number generator to insure even, yet random, distribution. The process for determining these numbers is as follows:

1. The number of total serial numbers divided by the number of total hand-seed tickets to be seeded into the game
 - a. This determines the number of hand-seed sections for the game
2. Within each range of serial numbers for the hand-seed sections, a random number will be generated
 - a. Each of these numbers are the serial numbers that contain the hand-seed tickets

International Gamco's Quality Assurance Manager will maintain the list of serial numbers in which the hand-seed tickets will be inserted into the packs.

The special sheet containing a hand-seed ticket will be designated as a hand-seed sheet. The hand-seed sheets will be printed, cut and glued separately from the regular sheets. The hand-seed sheets will be placed in a secured warehouse location until needed for each operation. Only Quality Assurance personnel will transmit the hand-seed sheets between locations. The hand-seed sheets will be inserted by a member of the Quality Assurance department at the 2-way based on the random serial numbers previously generated. A loser sheet will be pulled from the deal and a hand-seed sheet will be inserted in its place. Quality Assurance personnel will observe the deal running through the 2-way and verify that the serial numbers for the hand-seed tickets are accurate.

The four packs that are normally pulled for the Missouri Lottery will still be selected randomly, but exclude the selected packs that contain the hand-seed tickets.

Any extra hand-seed sheets that were printed, but not used in live deals, will be destroyed once the run is complete. The Quality Assurance manager will witness the sheets being shredded on site.

PRINTING SPECIFICATIONS

DRAFT: 7-5-07 DRAFT: 7-10-07

EXECUTED: 7-10-07

ORDERED QUANTITY: 1,500,000 (± 5%) tickets

TICKET SIZE: Approximately 1-7/8" x 4-1/4" (± 1/16")

PACK SIZE: 612 tickets

TICKET STOCK: Tickets consist of a top sheet glued to a bottom sheet. The black side of the bottom sheet will face inward. Ticket thickness will be .024 - .026 (± 5%).

Top Sheet: Tembec paper board- Kallima folding .012 C1S, supplied by Omaha Paper.

Bottom Sheet: .012 Domino black back index stock supplied by Newark Pacific Paperboard Company manufactured from 100% recycled paper fibers.

FLARE STOCK: The Flare will be printed on .012 Stock.

POINT OF SALE STOCK: The POS will be printed on .012 Stock.

SELL IN SHEET STOCK: The Sell in sheet will be printed on Gloss #100 Text.

RETAILER SAMPLES: Six sleeves of Non-winning samples to be delivered with the shipment. All samples will be marked "VOID" on the tab side of the ticket, and SAMPLE will be printed in serial number area on fronts.

CASHIER: On all winning tickets the prize amount won will appear in magenta overprinting on a yellow box immediately to the left of the winning play spots. See example on page 3.

WIN VERIFICATION: Win-bars will run through all winning combinations except the top (\$1000) tier. Ultra Violet Coin reactive ink, will be applied in an intricate pattern over-printed on each winning symbol in a winning combination. The same pattern will be used for all tiers in the game. See example on page 3.

Top (\$1000) tier: the Missouri Lottery Logo will appear in Ultra Violet Coin reactive ink in the 1st, 3rd, 4th, and 5th windows. See example on page 3.

TICKET NUMBERING: Four sleeves per carton starting with: 246MO 000001

(Pattern Gen Software is Version 3.0)

PATTERNS:

Missouri Pattern #703

1) Each non-winning tab window will contain one of the following:

- One winning symbol and two non-winning symbols (may be matching):

NON-WIN	NON-WIN	WIN
---------	---------	-----

- Two winning symbols (may be matching) and one non-winning symbol:

WIN	NON-WIN	WIN
-----	---------	-----

OR

NON-WIN	WIN	WIN
---------	-----	-----

- Two matching winning symbols and one other winning symbol:

WIN	WIN	WIN
-----	-----	-----

- Three non-matching winning symbols:

WIN	WIN	WIN
-----	-----	-----

2) A winning symbol will appear in the rightmost position of every tab window.

3) Three of the same symbols will never appear on the same line vertically, horizontally or diagonally on non-winning windows.

4) Winning combinations will be approximately evenly distributed.

5) Fifteen \$1000 tickets will be randomly placed among all packs, only one ticket maximum in a pack.

SLEEVE, CARTON & SHIPPING CASE

DRAFT: 7-5-07 DRAFT: 7-10-07

EXECUTED: 7-10-07

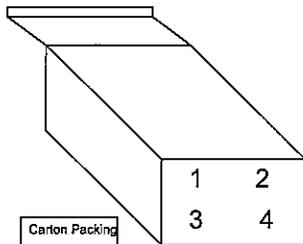

TRAY SIZE:

Outside dimensions of approximately 16 3/4" x 4 3/8" x 1 7/8"

CARTON SIZE:

Outside dimensions of approximately 9 3/4" x 17 3/4" x 4"

CARTON PACKING:

There will be 2448 tickets (4 trays of 612 tickets) in each carton. Each sleeve will be placed in an individual cardboard tray. One ticket of each sleeve will be "flipped" over and laid on top of the sleeve with the game side up, so that the sleeve's serial number is readily identifiable. Then each sleeve will be individually shrink wrapped with the flare inside. Cartons will contain four (4) sequentially numbered sleeve trays. Omitted serial numbers will be allowed.

CARTON LABEL:

Carton labels are created to customer specifications identifying the carton contents and will contain the following information:

CARTON LABEL EXAMPLE

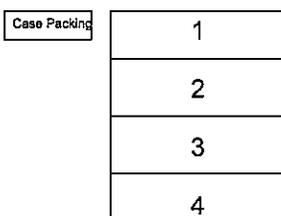

Actual label size 8" x 4"

Note: The information listed on carton label **example** must be placed on each carton.

SHIPPING CASE SIZE:

Outside dimensions of approximately 17 1/4" x 11" x 18 1/4"

SHIPPING CASE PACKING:

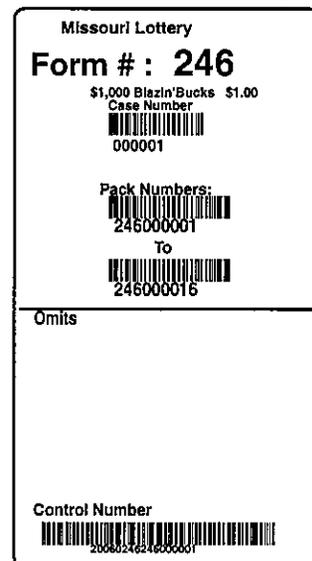

Each shipping case will have 4 cartons of 2448 tickets in each shipping case (16 sleeves). Shipping Case Numbering will start with 00000001. Cartons will be placed in the case in numerical order. Pack numbers working left to right, lowest number on the left, and low to high, with the lowest numbers on top and the highest numbers on the bottom. As for the cases, with the case label facing you, we would like to have the lowest number carton at the back of the case and the highest number carton, closest to the label.

SHIPPING CASE LABEL:

Shipping case labels are created to customer specifications identifying the shipping case contents and will contain the following information: See Shipping case label example. Note: The information listed on shipping case label **example** must be placed on each individual shipping case. Omitted serial numbers will be listed at the bottom of the shipping case label.

SHIPPING CASE LABEL EXAMPLE

Actual label size 4" x 8"

PALLETS

DRAFT: 7-5-07 DRAFT: 7-10-07

EXECUTED: 7-10-07

PALLETS:

Pack with lowest shipping case number on the top layer of the pallet, highest shipping case number on the bottom layer of the pallet, stacked 3 layers of 8 (full-pack pallets), 24 shipping cases.

40" x 48" with 5 runners and 7 slats. 4" high x 48" long to allow a forklift to enter the 40" side. Maximum height of 49" (not counting the pallet).

Pallets are to be sturdy.

Shipping case labels will face outward.

Four cardboard corner protectors will be used per pallet.

Pallet labels will show the shipping case numbers and the pallet number.

Pallet labels on all 4 sides, must be visible beneath the stretch wrap.

Tag the lowest shipping case number towards forklift.
